NEW PATIENT ORIENTATION SHEET

PHYSICIAN APPOINTMENTS

Each time you return to your referring physician, please notify our office at least 48 hours in advance, so we can prepare a progress note regarding your physical therapy treatment.

MEDICARE PATIENTS

Your referring physician must sign a plan of care/treatment which will be set by the evaluating physical therapist to assist in achieving your functional goals. This plan of care/treatment can be for a period of up to 90 days in accordance with government mandates. This plan of care will be sent to your referring physician with the initial evaluation letter.

KEEPING APPOINTMENTS

We ask that you arrive on time and keep all scheduled appointments unless a true emergency arises. Missed appointments have resulted in our patients being denied further worker's compensation benefits. We reserve the right to bill you \$30.00 for missed appointments without a 24-hour notice of any appointment change or reschedule.

YOUR FINANCIAL RESPONSIBILITIES

Your insurance company requires that you present your insurance card. We will call your insurance company to verify what your financial responsibilities will be for your physical therapy services. If your insurance policy does not pay 100% of your physical therapy treatments, any co-payments, co-insurance, and/or deductible amounts are due at the time of service. **If your insurance coverage changes during treatment, please let us know,** so that we may re-verify your insurance and make you aware of any changes to your physical therapy benefits. We cannot guarantee the benefits quoted by your insurance company. Insurance verifications are not a guarantee of payment by your insurance carrier.

You are responsible for any charges that your insurance deems your responsibility. It is your responsibility to know your insurance benefits. If they determine your coverage to be different at the time of claims processing, you will be billed any balance due that is deemed your responsibility. We accept cash, checks and most major credit cards.

A 1.5% monthly finance charge (18% APR) **may be applied** to accounts with any remaining patient balances over 30 days from the time the last insurance payment is received.

CONSENT TO WIRELESS TELEPHONE CALLS: If at any time you provide a wireless telephone number you consent to receiving calls or text messages which include but are not restricted to communications regarding billing and payment for items and services. You must notify Tri-State Rehab to the contrary in writing to opt out. Calls/text messages include but are not restricted to pre-recorded messages, artificial voice messages, automatic telephone dialing devices or other computer assisted technology, electronic mail, text messaging or any other form of electronic communication from Tri-State Rehab, its affiliates, contractors, servicers, attorneys or its agents including collection agencies.

CONSENT TO E-MAIL USAGE: If at any time you provide an email address at which you may be contacted, unless you notify Tri-State Rehab to the contrary in writing, you consent to receiving statements, bill and marketing material for services and payment receipts at that email address from Tri-State Rehab.

DRY NEEDLING CONSENT & INFORMATION FORM

WHAT IS DRY NEEDLING?

Dry needling is a form of therapy in which fine needles are inserted into myofascial trigger points (painful knots in muscles), tendons, ligaments, or near nerves in order to stimulate a healing response in painful musculoskeletal conditions. Dry needling is not acupuncture or Oriental Medicine; that is, it does not have the purpose of altering the flow of energy (“Qi”) along traditional Chinese meridians for the treatment of diseases. In fact, dry needling is a modern, science – based intervention for the treatment of pain and dysfunction in musculoskeletal conditions such as neck pain, shoulder impingement, tennis elbow, carpal tunnel syndrome, headaches, knee pain, shin splints, plantar fasciitis, or low- back pain.

IS DRY NEEDLING SAFE?

Drowsiness, tiredness or dizziness occurs after treatment in a small number of patients (1-3%) and if affected, you are advised not to drive. Minor bleeding or bruising occurs after dry needling in 15-20% of treatments and is considered normal. Temporary pain during dry needling occurs in 60-70% of treatments. Existing symptoms can get worse after treatment (less than 3% of patients); however, this is not necessarily a ‘bad’ sign. Fainting can occur in certain patients (0.3%), particularly at the first treatment session when needling the head or neck regions. Dry needling is very safe; however, serious side effects can occur in less than 1 per 10,000 (less than 0.01%) treatments. The most common serious side effect from dry needling is pneumothorax (lung collapse due to air inside the chest wall). The symptoms of dry needling-induced pneumothorax commonly do not occur until after the treatment session, sometimes taking several hours to develop. The signs and symptoms of a pneumothorax may include shortness of breath on exertion, increased breathing rate, chest pain, a dry cough, bluish discoloration of the skin, or excessive sweating. If such signs and/or symptoms occur, you should immediately contact your physical therapist or physician. Nerves or blood vessels may be damaged from dry needling which can result in pain, numbness or tingling; however, this is a very rare event and is usually temporary. Damage to internal organs has been reported in the medical literature following needling; however these are extremely rare events (1 in 200,000).

IS THERE ANYTHING YOUR PRACTITIONER NEEDS TO KNOW?

1. Have you ever fainted or experienced a seizure? YES _____ NO _____
2. Do you have a shunt, pacemaker or any electrical implants? YES _____ NO _____
3. Are you currently taking anticoagulants (blood-thinners e.g. aspirin, warfarin, Coumadin)? YES _____ NO _____
